March 12, 2021

Chairman and Members, Board of Directors
Florida Governmental Utility Authority
1500 Mahan Drive, Suite 250
Tallahassee, FL 32308

Florida State law requires that all units of local government publish a complete set of financial statements presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, the Comprehensive Annual Financial Report of the Florida Governmental Utility Authority (FGUA) for the fiscal year ended September 30, 2020 is hereby submitted. Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the management of the FGUA. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the FGUA. All disclosures necessary to enable the reader to gain an understanding of the FGUA's financial activities have been included.

The Florida Governmental Utility Authority's financial statements have been audited by James Moore & Co. P.L., a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Florida Governmental Utility Authority for the fiscal year ended September 30, 2020, are free of material misstatement. The independent audit involved examining on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based on the audit, that there was a reasonable basis for rendering an unmodified ("clean") opinion that the Florida Governmental Utility Authority's financial statements for the Fiscal Year ended September 30, 2020, are fairly presented in conformance with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it.

The Florida Governmental Utility Authority's MD&A can be found immediately following the report of the independent auditors.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

PROFILE OF THE GOVERNMENT

The FGUA exists as a legal entity and public body pursuant to Chapters 125, 163, and 166, Florida Statutes, and a First Amended and Restated Interlocal Agreement dated as of December 1, 2000, as restated, amended and supplemented from time to time (the “Interlocal Agreement”) by and among various local governments located in the State of Florida. The table below outlines the original member governments as well as the changes and current status of other member governments throughout the years as follows:

Local Government	Notes	Status	Year Joined	Year Terminated
Brevard County	[a]	Terminated member	1999	2000
Citrus County		Current member	2003	
Collier County		Terminated member	1999	2018
Desoto County		Terminated member	2009	2015
Flagler County		Current member	2020	
Hendry County		Current member	2008	
Lee County	[a]	Current member	1999	
Marion County		Current member	2013	
Nassau County		Current member	2020	
Osceola County		Terminated member	2003	2009
Pasco County		Current member	2008	
Polk County	[a]	Current member	1999	
Sarasota County	[a]	Terminated member	1999	2002
Town of Dundee		Terminated member	2007	2008

[a] Original establishment member governments

PURPOSE OF THE GOVERNMENT

The purpose of the FGUA is to enable its members to make the most efficient use of their common power to acquire, own, improve, operate, and maintain water and wastewater facilities. Authority membership is not a prerequisite to the acquisition of property within any particular jurisdiction. As of September 30, 2020, the FGUA managed and operated 97 water systems and 33 wastewater systems located in thirteen counties in Florida. These systems are accounted for in nine separate enterprise funds, each with their own revenue bonds.

The FGUA does not have any employees. All services are provided on a contractual basis predicated on the management and operational needs of the FGUA. Overall management (including executive oversight, administration, financial management, capital planning, and construction contract supervision) is provided by Government Services Group, Inc. Daily operations, maintenance, customer service, and billing services are provided by US Water Services Corporation.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

OPERATIONAL ACTIVITY OF THE GOVERNMENT

The FGUA began its operational and fiscal activities on the date of acquisition of five water and wastewater systems on April 15, 1999. The table below outlines the utility systems acquired by year and in certain utility systems, the year the system was successfully transferred back to the host government or other established authority as follows:

Utility System	Year Acquired	Year Transferred	County/Authority Transferred To
Barefoot Bay	1999	2000	Brevard
Carrollwood	1999	2004	Hillsborough
Golden Gate	1999	2018	Collier
Poinciana	1999	2007	Tohopekaliga Water Authority
Sarasota	1999	2002	Sarasota
Citrus County	2003	2007	Citrus
Lehigh Acres	2003		
Aloha Utilities (Aloha Gardens & Seven Springs)	2009		
Consolidated	2009		
Lindrick	2010		
North Ft. Myers	2010		
MacDill AFB	2010		
Mad Hatter/Paradise Lakes	2012		
Lake Aqua	2013		
Pasco Aqua	2013	2020	Pasco
Unified Aqua	2013		
City of Dunnellon	2018		

As of September 30, 2020, the FGUA consisted of 120 water and wastewater systems located in thirteen counties in Florida. The systems are grouped into ten enterprise funds, primarily on a geographic basis. There is also a Non-System Specific enterprise fund for the other minor contractual services provided by the FGUA.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

BACKGROUND INFORMATION ON ENTERPRISE FUNDS

LEHIGH ACRES UTILITY SYSTEM

SERVICE AREA

Lehigh Acres is in the Eastern portion of Lee County, Florida, located east of State Road 82 and south of State Road 80. Fort Myers is the largest population center located due west of Lehigh Acres. Lehigh Acres occupies approximately 94.9 square miles of developed residential and light commercial property. The majority of properties are zoned single family residential. Duplex residential and light commercial properties are located along the main roadways. Less than 50 percent of Lehigh Acres is served by public water service, with 38 percent served by central wastewater service. The Florida Governmental Utility Authority has utility service primarily along three major roadway corridors, Lee Boulevard running east and west, Homestead Road running southwest and Joel Boulevard running north and south. Both old and new planned neighborhoods are scattered along these roadways and typically have water and wastewater service.

WATER SYSTEM

The Lehigh Acres water system consists one (1) 3.10 MGD water treatment plant (WTP), thirteen (13) production wells, two (2) booster stations, and an interconnect with the city of Fort Myers which allows for up to 2.0 MG peak daily flow.

WASTEWATER SYSTEM

The Lehigh Acres wastewater system consists of one (1) wastewater treatment plant (WWTP) with a permitted capacity of 2.76 MGD AADF, a deep injection well (DIW) with a permitted disposal capacity of 18.6 MGD, collection and transmission mains, and lift stations. The system provides reclaimed water to two (2) major users (golf courses) and is permitted for 1.28 MGD AADF.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

PASCO UTILITY SYSTEM

SERVICE AREA

The physical facilities of the Pasco Utility System are located in two distinct service areas, the Aloha Gardens service area and the Seven Springs service area. The Pasco Utility systems are located in Pasco County, immediately north of Pinellas and Hillsborough Counties, with the Aloha Gardens service area west of U.S. Highway 19 and the Seven Springs service area to the east of U.S. Highway 19.

WATER SYSTEM

Aloha Gardens - The Aloha Gardens water system consists of one (1) production well with a permitted withdrawal limit of 0.123 MGD AADF, associated disinfection system, and a hydro tank. The Aloha Gardens system purchases additional water from Pasco County through three (3) interconnects.

Seven Springs - The Seven Springs water system consists of one (1) centralized WTP with a permitted treatment capacity of 2.90 MGD and includes seven (7) production wells. The Seven Springs water system is also interconnected with Pasco County and is required to purchase all water beyond its Water Use Permit limit of 2.289 MGD AADF.

WASTEWATER SYSTEM

Aloha Gardens - The Aloha Gardens wastewater system consists of twelve (12) lift stations and the associated collection and transmission system. All wastewater from the Aloha Gardens service area is sent to Pasco County for treatment and disposal through a bulk service agreement.

Seven Springs - The Seven Springs wastewater system consists of one (1) wastewater treatment plant with a permitted capacity of is a 2.9 MGD AADF, and seventy-one (71) lift stations. The system provides reclaimed water to residential and commercial customers and is permitted for 3.089 MGD AADF

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

CONSOLIDATED UTILITY SYSTEM

SERVICE AREA

The Consolidated Utility System is comprised of ten (10) small service areas: Anclote, Angus Valley, Colonial Manor, Dixie Groves, Virginia City, Westwood, Mad Hatter East (Carpenters Run, Turtle Lakes, and Twin Palms), Mad Hatter West (Foxwood Lakes and Cypress Cove), Linda Lakes and Paradise Lakes. These systems are geographically spread throughout Hillsborough County, Pasco County and Pinellas County and collectively make up the Consolidated Utility System.

WATER SYSTEM

The Consolidated water system consists of ten (10) separate small water systems. Eight (8) of these systems (Angus Valley, Dixie Groves, Virginia City, Westwood, Mad Hatter East, Mad Hatter West, Linda Lakes, and Paradise Lakes) have small WTPs with permitted withdrawal limits ranging from 0.029 MGD AADF (Westwood) to 1.00 MGD AADF (Mad Hatter East/West). The water systems generally consist of one (1) or two (2) production wells, associated disinfection systems, and small hydro tanks. Two (2) of the water systems (Anclote and Colonial Manor) are interconnected with neighboring utilities and all water is purchased. A complete listing of these facilities and associated capacities is shown on Table 1.

WASTEWATER SYSTEM

The Consolidated wastewater system consist of one (1) WWTP with a permitted capacity of 0.020 MGD TMRADF, collection and transmission mains and lift stations. The WWTP only serves the Linda Lakes community and all other wastewater from the Mad Hatter East, Mad Hatter West and Paradise Lakes wastewater systems are sent to Pasco County via an interconnect for treatment and disposal.

Anclote, Angus Valley, Colonial Manor, Dixie Groves, Virginia City and Westwood are water only systems and have no wastewater facilities.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

LINDRICK UTILITY SYSTEM

SERVICE AREA

The Lindrick service area is comprised of approximately 3.24 square miles and consists of a population of approximately 4,600 people. The majority of the Lindrick service area is located west of US-19 on Florida's Gulf of Mexico coastline, extending from Trouble Creek Road to Green Key Road, which includes the Shamrock Height Subdivision.

WATER SYSTEM

The Lindrick water system consists of six (6) production wells (No. 2, 3, 4, 5, 6, 8) with a combined permitted withdrawal limit of 870,000 GPD AADF. Wells No. 1 and 7 are currently out of service. Water from all wells is conveyed to a centralized WTP located at the Well No. 1 site. This centralized WTP has a design capacity of 1.944 MGD. There are also two (2) emergency bulk water interconnects with the City of New Port Richey which are available to supplement water supply when needed.

WASTEWATER SYSTEM

The Lindrick wastewater collection system consists of approximately 482 manholes, 114,198 feet of gravity sewer and eighteen (18) lift stations. All wastewater is sent to the city of New Port Richey WWTP for treatment and disposal under a Bulk Wastewater Treatment Agreement. The current agreement is in effect until July 1, 2021 and allows up to 700,000 gallons per day of treatment capacity.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

MACDILL AIR FORCE BASE UTILITY SYSTEM

SERVICE AREA

The MacDill Air Force Base (AFB) is located eight miles south of downtown Tampa on the Southwestern tip of the interbay Peninsula on the west coast of Florida. The AFB privatized utilities in 2011 and ownership of all water and wastewater system assets transferred to the FGUA. The FGUA now has the primary responsibility in operating and maintaining the system.

WATER SYSTEM

The MacDill AFB purchases treated water from the city of Tampa Water Department through three interconnections. The MacDill AFB water system consists of treatment facilities, water storage tanks, the transmission/distribution system, along with associated pumps, valves and appurtenances. The water system is well designed with multiple supply points, effective system looping, and sufficient storage capacity.

WASTEWATER SYSTEM

The MacDill AFB wastewater system consists of one (1) wastewater treatment plant (WWTP) with a permitted capacity 1.20 MGD AADF, collection and transmission mains, lift stations, an effluent disposal system and a biosolids disposal system. The system provides reclaimed water to two (2) major users (golf courses) located at the AFB.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

NORTH FORT MYERS UTILITY SYSTEM

SERVICE AREA

The North Fort Myers service area is located immediately north of Caloosahatchee River in Lee County, mainly between Interstate 75 and US 41. The service area occupies approximately 39 square miles and is comprised of single family and multi-family residential, light commercial, and undeveloped properties. The North Fort Myers service area is mainly a wastewater system due to the fact that Lee County serves potable water to a large portion of the North Fort Myers service area but FGUA does supply water to two small water systems (Pine Lakes and Lake Fairways).

WATER SYSTEM

The water system consists of two (2) small separate systems: Pine Lakes and Lake Fairways. The Pine Lakes water system is supplied by Lee County through an interconnect. The Lake Fairways water system consists of two (2) production wells with a permitted withdrawal limit of 37 MG annually (0.101 MGD). Raw water from the wells is conveyed to a centralized WTP located inside the community. Both Pine Lakes and Lake Fairways systems are built out with no future development expected.

WASTEWATER SYSTEM

The North Fort Myers system is served by two (2) separate collection and treatment facilities, the Del Prado WWTP and the Lake Fairways WWTP.

Del Prado - The Del Prado wastewater system consist of one (1) WWTP with a permitted capacity of 4.25 MGD AADF, a deep injection well (DIW) with a permitted disposal capacity of 4.87 MGD maximum daily flow, collection and transmission mains, and lift stations. The system provides reclaimed water to seven (7) major users (golf courses, and landscape irrigation for developments) and is permitted for 5.251 MGD AADF.

Lake Fairways - The Lake Fairways wastewater system consists of one (1) WWTP with a permitted capacity of 0.300 MGD AADF, collection and transmission mains, and lift stations. The system provides reclaimed water to one (1) major user (Pine Lakes golf course).

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

LAKE AQUA UTILITY SYSTEM

SERVICE AREA

FGUA currently owns and operates twenty-five (25) water systems and eight (8) wastewater systems in Lake County, Florida. These systems are geographically scattered across Lake County and collectively make up the Lake Aqua Utility System. The largest contiguous Lake Aqua Utility System service area is shown below.

WATER SYSTEM

The Lake Aqua water system consist of approximately twenty-five (25) separate water systems and associated WTPs. Most of the water systems are relatively small, with sixteen (16) systems serving 200 connections or less, eight (8) systems serving 200 to 500 connections, and the largest system in the group (Silver Lake Estates) serving approximately 1,100 connections. The water systems generally consist of one (1) or two (2) production wells, associated disinfection systems, and small hydro tanks. Most are permitted by the Florida Department of Environmental Protection and have a Consumptive Use Permit (CUP) from the St. Johns River Water Management District (SJRWMD). A complete listing of these facilities and associated capacities is shown on Table 1.

WASTEWATER SYSTEM

The Lake Aqua wastewater system consists of eight (8) separate wastewater systems, seven (7) wastewater treatment plants (WWTPs) which range in permitted capacity from 0.020 MGD AADF (Morningview) to 0.080 MGD AADF (Valencia Terrace), collection and transmission mains, and lift stations. Effluent disposal at the facilities generally consists of rapid infiltration basins or permitted reuse facilities using sprayfields. A complete listing of these facilities and associated capacities is shown on Table 2.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

UNIFIED AQUA UTILITY SYSTEM

SERVICE AREA

FGUA currently owns and operates forty-four (44) water systems and thirteen (13) wastewater systems located throughout various Florida counties including: Alachua, Citrus, Hardee, Lee, Marion, Orange, Polk, Putnam, Seminole, and Volusia Counties. These systems are geographically spread throughout Florida and collectively make up the Unified Aqua Utility System. Chuluota, shown below, is the largest single service area in the Unified Aqua Utility System.

WATER SYSTEM

The Unified Aqua water system consists of forty-four (44) separate water systems. Permitted capacities for the water systems range from a minimum of 21,096 gpd (Palm Port) to a maximum of 540,000 gpd (Chuluota). Many of the water systems do not have consumptive use permits due either to the smaller size of their system or because the facility purchases water from a neighboring utility.

Most of the water facilities are relatively small with thirty-five (35) systems serving 200 connections or less, eight (8) serving between 200 and 850 connections, and the largest system in the group (Chuluota) serving approximately 1,590 connections. The water systems generally consist of one (1) or two (2) production wells, associated disinfection systems, and small hydro tanks. Most are permitted by the Florida Department of Environmental Protection and have a Consumptive Use Permit (CUP) from one of the Florida Water Management Districts (WMDs). A complete listing of these facilities and associated capacities is shown on Table 1.

WASTEWATER SYSTEM

The Unified Aqua wastewater system consists of thirteen (13) separate wastewater systems, ten (10) wastewater treatment plants (WWTPs) which range in permitted capacity from 12,000 gpd (Silver Lake Oaks) to 264,000 gpd (South Seas), collection and transmission mains, and lift stations. Three (3) of the wastewater systems (Beecher's Point, Florida Central Commerce Park and Lake Gibson) pump flows to neighboring utilities via interconnects for treatment and disposal. A complete listing of these facilities and associated capacities is shown on Table 2.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

DUNNELLOM UTILITY SYSTEM

SERVICE AREA

The Dunnellon service area is comprised of four (4) separate service areas: City of Dunnellon, Juliette Falls, Rainbow Springs and Rio Vista. These systems are geographically scattered across the Southwest region of Marion county and collectively make up the Dunnellon Utility System.

WATER SYSTEM

The Dunnellon water system consists of four (4) water systems: City of Dunnellon, Rainbow Springs and Rio Vista are combined under one (1) water user permit with a permitted withdrawal capacity of 1.117 MGD AADF, and Juliette Falls has its own water use permit with a permitted withdrawal capacity of 0.017 MGD AADF.

WASTEWATER SYSTEM

City of Dunnellon – The City of Dunnellon wastewater system consists of one (1) wastewater treatment plant (WWTP) with a permitted capacity of 0.490 MGD AADF, associated collection and transmission mains, and lift stations.

Juliette Falls – The Juliette Falls wastewater system consists of one (1) wastewater treatment plant (WWTP) with a permitted capacity of 0.100 MGD TMRADF, associated collection and transmission mains, and lift stations. Currently all wastewater generated by the Juliette Falls wastewater system is hauled to the City of Dunnellon WWTP for treatment.

Rainbow Springs – The Rainbow Springs wastewater system consists of one (1) wastewater treatment plant with a permitted capacity of 0.230 MGD TMRADF, associated collection and transmission mains, and lift stations.

Rio Vista – The Rio Vista wastewater system consists of collection and transmission mains, and lift stations. All wastewater generated by the Rio Vista wastewater system is treated at the Rainbow Springs WWTP.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

ECONOMIC CONDITION

The information presented in the financial statement is perhaps best understood when it is considered from the broader perspective of the specific environment within which the FGUA utility systems are located.

Both the Lehigh Acres Utility System and the North Fort Myers Utility System are located in Lee County, which had been one of the fastest growing regions in the nation until the downturn in the housing market in 2007. According to data from the Florida Legislature Office of Economic and Demographic Research, Lee County's population was anticipated to increase from 618,754 in 2010 to 735,148 in 2019, an increase of 18.8%. The number of housing units permitted in Lee County increased from a six-year average beginning in 2013 of 3,176 to 9,105 in 2019. The unemployment rate continued to decline from the peak of 12.5% in 2010 to 3.1% in 2019. Recent foreclosure information suggests that the housing market continues to improve. Personal bankruptcy filings slightly improved from 1.70 per 1,000 of population in 2019 to 1.52 per 1,000 of population as of September 30, 2020. The two Lee County systems have a significant amount of undeveloped land for future growth and expansion.

The Pasco, Lindrick, Consolidated and Pasco Aqua Utility Systems are located in Pasco County. According to data from the Florida Legislature Office of Economic and Demographic Research, Pasco County's population was anticipated to increase from 464,697 in 2010 to 527,122 in 2019, an increase of 13.4%. The number of housing units permitted in Pasco County increased from a six-year average beginning in 2013 of 1,974 to 4,551 in 2019. The unemployment rate continued to decline from the peak of 11.9% in 2010 to 3.5% in 2019. Personal bankruptcy filings slightly improved from 2.39 per 1,000 of population in 2019 to 1.98 per 1,000 of population as of September 30, 2020. Again, recent data suggests an improvement in market conditions. Portions of the FGUA service areas in Pasco County (Seven Springs) have significant potential for future growth and development, while others have limited growth opportunities.

The Lake Aqua Utility Systems are located in Lake County. The FGUA service area within Lake County is largely built out and has limited growth opportunities. According to data from the Florida Legislature Office of Economic and Demographic Research, Lake County's population was anticipated to increase from 297,047 in 2010 to 357,247 in 2019, an increase of 20.3%. The number of housing units permitted in Lake County increased from a six-year average beginning in 2013 of 1,730 to 3,497 in 2019. The unemployment rate continued to decline from the peak of 11.8% in 2010 to 3.2% in 2019. Personal bankruptcy filings slightly improved from 2.37 per 1,000 of population in 2019 to 2.12 per 1,000 of population as of September 30, 2020.

The Unified Aqua Utility System is spread throughout 10 different Florida Counties. The majority of the customers are located within Seminole County and Polk County. According to released data from the Florida Legislature Office of Economic and Demographic Research, Florida's population is anticipated to increase annually by 387,479 from 2019 to 2020. The number of housing units permitted in Florida is back in positive territory, showing continued strong growth throughout the State. The unemployment rate continued to decline from the peak of 11.1% in 2010 to 3.1% as of December 2019.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

INTERNAL CONTROL

In developing and evaluating the FGUA's accounting system, consideration is given to the adequacy of internal accounting controls. Internal accounting controls are designed to provide reasonable, but not absolute assurance regarding: (1) the safeguarding of assets against loss from unauthorized use or disposition; and (2) the reliability of financial records for preparing financial statements and maintaining accountability for assets. The concept of reasonable assurance recognizes that: (a) the cost of a control should not exceed the benefits likely to be derived there from; and (b) the evaluation of costs and benefits requires estimates and judgments by management. We believe all internal control evaluations occur within the above framework and that the FGUA's internal accounting controls adequately safeguard assets and provide reasonable assurance of proper recording of financial transactions.

BUDGETARY CONTROL

The FGUA maintains a system of budgetary controls. The objective of these controls is to ensure compliance with legal provisions embodied in the annual appropriated budget approved by the Board. The level of budgetary control (i.e., the level at which expenditures cannot legally exceed the appropriated amount) is at the fund level. The FGUA also maintains an encumbrance system as one method of maintaining budgetary control. Encumbered amounts lapse at year end; however, outstanding encumbrances are re-appropriated as part of the following year's budget.

The budget process begins in the spring, when the staff develops proposed capital projects and operating budgets, with input from the Capital Program and Operations Managers and the Contract Operator. A planning meeting by the Board of Directors and senior staff is conducted in February or March of each year and is used to establish or update long-range system goals. Detailed budgets are presented by staff to the Systems Manager in late May. The System Manager's budget is forwarded to the Board of Directors in June. Any adjustments to the budget, to include public hearings for any necessary rate changes, are typically conducted in August and September. The Board of Directors approves the final budget at a public hearing in September for the new fiscal year that begins October 1.

As demonstrated by the statements and schedules included in the financial section of this report, the FGUA meets its responsibility for sound financial management.

FACTORS AFFECTING FINANCIAL CONDITION

Capital Improvement Program – The FGUA has adopted a five-year Capital Improvement Program (CIP) for the years 2021 to 2025, which outlines additions and improvements to its utility systems. The FGUA reviews and updates this five-year plan annually, authorizing appropriations for those projects scheduled to be started during the ensuing fiscal year. The cost of all new projects for fiscal year 2021 is approximately \$38 million and is estimated to total \$115 million for the fiscal years 2021 – 2025. The CIP for each system is segregated into five major program areas, as follows:

Wastewater Collection – This program calls for improvements to existing wastewater lines as well as the addition of new lines as the customer base increases. This program also calls for renewal of the existing system by repairing lines that allow infiltration/inflow and the rehabilitation of lift stations.

INTRODUCTORY SECTION

Florida Governmental Utility Authority Letter of Transmittal (continued)

Wastewater Treatment Facilities/Disposal – This program seeks to increase existing capacity as well as upgrade existing facilities. The objectives of this program are to promote use of reclaimed water, protect the environment, ensure that treatment capacity is available for growth, and ensure that facilities are in compliance with regulations of the United States Environmental Protection Agency and the State of Florida Department of Environmental Protection.

Water Treatment Facilities (Water Production/Treatment) – This program ensures that the FGUA is able to deliver water to its customers during peak periods by expanding current production capabilities. This program also includes a comprehensive renewal program which provides for maintenance of water tanks, well pump facilities, well power systems, and filtration equipment.

Water Distribution – This program calls for improvements to existing water lines as well as the addition of new lines as the customer base increases.

Meters – In order to maintain accurate water usage data for appropriate billing and reporting, the FGUA replaces a certain number of meters each year. Most residential meters are replaced at ten years of age. Larger meters need to be replaced more frequently.

Large Capital Projects – Specific project cost centers are created for special large projects as needed.

The successful implementation of FGUA’s Capital Improvement Program calls for a portion of funding to be provided through existing balances of construction funds from bonds, with the remaining amounts to be funded from operating revenues and impact fees.

The MD&A describes the major changes in capital asset balances. Note 6 shows the increases and decreases for the FGUA in a summarized format. The adopted budget has details of the large capital projects for each enterprise fund and can be found at:
<https://www.fgua.com/about-us/finance/budgets/budget-documents/>

FINANCIAL POLICIES

In January 2009, the FGUA Board approved a Net Asset (Working Capital) Policy in order to maintain and improve financial stability and manage its financial resources for its various enterprise funds to: (1) provide sufficient cash flow for daily financial needs, (2) secure and maintain the highest possible investment grade bond ratings, (3) position properly for significant economic downturns or revenue shortfalls, and (4) provide funds for unforeseen expenditures related to emergencies.

The FGUA’s investment policy is designed to minimize credit and market risk while maintaining a competitive yield on its investments. As of the end of the Fiscal Year all deposits were entirely covered by either federal depository insurance or pooled collateral held by the State Treasurer pursuant to Chapter 280, Florida Statutes.

Florida Governmental Utility Authority Letter of Transmittal (continued)

AWARDS AND ACKNOWLEDGEMENTS

The Government Finance Officers Association of the United States and Canada (GFOA) awarded an eighteenth consecutive Certificate of Achievement for Excellence in Financial Reporting to the Florida Governmental Utility Authority for its Comprehensive Annual Financial Report for the fiscal year ending September 30, 2019. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current Comprehensive Annual Financial Report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report could not have been accomplished without the efficient and dedicated services of the financial staff. Appreciation is expressed to all those who assisted and contributed to its preparation and to the Board for its interest and support in planning and conducting the operations of the FGUA in a responsible manner.

Respectfully submitted,

Stephen M. Spratt, System Manager

David M. DiLena, CPA Chief Financial Officer

INDEPENDENT AUDITORS' REPORT

To the Board of Directors,
Florida Governmental Utility Authority:

Report on the Financial Statements

We have audited the accompanying financial statements of the business-type activities and each major fund of Florida Governmental Utility Authority (the Authority), as of and for the year ended September 30, 2020, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

The Authority's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the business-type activities and each major fund of the Authority, as of September 30, 2020, and the respective changes in financial position and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that management's discussion and analysis, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

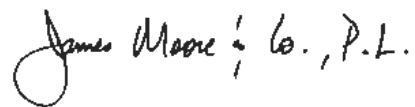

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Authority's basic financial statements. The accompanying introductory section, statistical section, and schedule of expenditures of state financial assistance as required by Section 215.97, Florida Statutes, *Florida Single Audit Act*, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedule of expenditures of state financial assistance is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 12, 2021, on our consideration of the Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control over financial reporting and compliance.

Daytona Beach, Florida

FINANCIAL

Florida Governmental Utility Authority Management’s Discussion and Analysis

As management of the Florida Governmental Utility Authority (FGUA), we offer readers of the FGUA’s financial statements this narrative overview and analysis of the financial activities for the fiscal year ending September 30, 2020. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found in the introductory section of this report.

FINANCIAL HIGHLIGHTS

The assets and deferred outflows of the FGUA exceeded its liabilities and deferred inflows at the close of fiscal year 2020 by \$129,112,084 as the chart to the right indicates. Of this amount, \$67,547,602 may be used to meet the FGUA’s ongoing obligations to citizens and creditors (Unrestricted Net Position). This is an increase of \$2,131,666 or 3% in unrestricted net position from the prior year. This increase is reflective of normal operations year-over-year.

NET POSITION

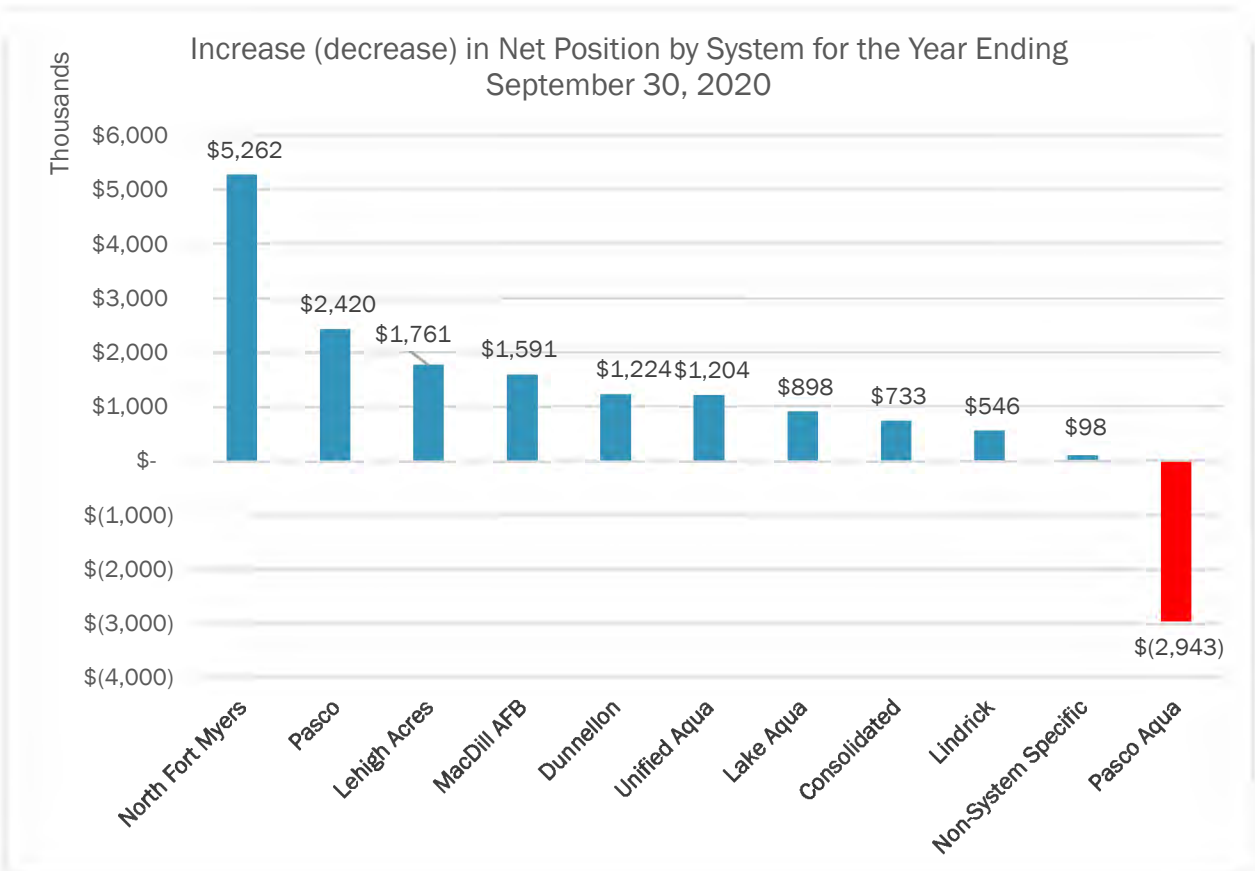

The FGUA’s total net position increased by \$12.8 million in fiscal year 2020. As the chart on the next page indicates, the changes in net positions were as follows:

- The North Fort Myers Utility System contributed \$5.3 million or 41.13% of the increase in total net position. This increase came from non-operating income such as interest deposits, impact fees and additions to utility plant assets. This system also benefited from a full year’s worth of interest expense saving due to prior debt refunding.
- The Pasco Utility System contributed \$2.4 million or 18.91% of the increase in total net position. This increase is a combination of impact fees received related to Mitchell 54 development and a consumer price index (CPI) rate increase.
- The Lake Aqua and Unified Aqua Utility Systems resulted in a combined \$2.1 million or 16.43% of the increase in total net position. This increase is primarily a result of a consumer price index (CPI) rate increase along with customer growth. Additionally, the Lake Aqua Utility System benefited from the receipt of capital grant funding.
- The Lehigh Acres Utility System contributed \$1.8 million or 13.76% of the increase in total net position. This increase came from non-operating income such as interest deposits, impact fees and additions to utility plant assets.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

- The MacDill AFB Utility System contributed \$1.6 million or 12.43% of the increase in total net position, primarily due to capital grants.
- The Dunnellon Utility System contributed \$1.2 million or 9.57% of the increase in total net position. This system benefited from the receipt of capital grants.
- The Consolidated Utility System contributed \$732,999 or 5.73% of the increase in total net position. This increase came from non-operating income such as interest deposits, impact fees and additions to utility plant assets. Higher expenditures for bulk wastewater placed downward pressure on the Consolidated Utility System increase in net position.
- The Lindrick Utility System contributed \$546,185 or 4.27% of the increase in total net position. This system also benefited from a full year's worth of interest expense saving due to prior debt refunding.
- The Pasco Aqua Utility System resulted a \$2.9 million loss or -23.00% of the increase in total net position. This decrease was due to the transition of the Pasco Aqua Utility system to Pasco County on June 30, 2020.
- The Authority has one non-specific fund that pre-pays expenses, and then is reimbursed by the appropriate enterprise funds upon determination of a reasonable allocation basis. It also pays for the rare non-allocable expenses for minor contractual services provided to the Authority. This fund had an increase in net position of \$98,337.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

DEBT

The net decrease in total debt as of September 30, 2020 was \$26,435,193. As the chart below indicates, the Pasco Aqua Utility System was responsible for \$18.1 million of this reduction. The Lake Aqua Utility System contributed additional new debt in the amount of \$603,312 with a construction loan from the State Revolving Fund (SRF) for wastewater system improvements. All other systems experienced decreases in debt due to normally scheduled debt service payments.

To avoid potential future reductions of “Build America Bond” (BAB) subsidies, and with the recommendations from our Financial Advisor, we advanced refunded certain bonds to achieve debt service savings for the Pasco Utility Systems BABs bonds in October 2019. The debt service savings achieved will be realized in future years beginning in FY2021.

More information can be found in Note 7 of the Financial Section.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Florida Governmental Utility Authority's (FGUA) basic financial statements. The FGUA is a special purpose government involved solely in the provision of water and wastewater services to customers on a fee basis. All funds are accounted for in Proprietary Funds, specifically, eleven enterprise funds. There are no government-wide financial statements, as they would be redundant to the fund financial statements. This report contains fund financial statements and notes to the financial statements. The report also contains other supplementary information in addition to the basic financial statements themselves.

FUND FINANCIAL STATEMENTS

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The FGUA, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All funds of the FGUA are proprietary funds, with one fund set up for each geographically separate utility system operated by the FGUA.

Proprietary Funds

The FGUA operates only one type of proprietary fund, and a separate enterprise fund is maintained for each utility system. Enterprise funds are used to report business-type functions, which recover all or a significant portion of their costs through user fees and charges.

The proprietary fund financial statements are comprised of a Statement of Net Position, a Statement of Revenues, Expenses and Changes in Net Position, and a Statement of Cash Flows. The Statement of Net Position presents information on the FGUA's assets, deferred outflows of resources, liabilities, deferred inflows of resources and net position. The Statement of Revenues, Expenses and Changes in Net Position presents information on the revenues received, the expenses incurred, and the positive or negative results of the individual utility system's increase or decrease in net position as presented on an accrual basis. The Statement of Cash Flows provides information on the cash flows of each utility system, based on operations, financing activities, capital uses, and investment activities and a supplemental schedule of noncash activities.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the financial statements.

Other Information

In addition to the basic financial statements and accompanying notes, this report also presents supplementary information concerning its compliance with the funding of outstanding debt issues. This information, known as Coverage Ratios, is provided as part of the information contained in the Statistical Section of this report.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

OVERALL ANALYSIS OF FINANCIAL POSITION AND RESULTS OF OPERATIONS

NET POSITION

Net position may serve over time as a useful indicator of a government's financial position. In the case of the Florida Governmental Utility Authority, the assets and deferred outflows exceeded the liabilities and deferred inflows by \$129 million at the close of fiscal year 2020. See the condensed Statement of Net Position table on page 34.

In the past year, current assets decreased by \$92.2 million. Of this amount, \$74 million is due to a classification change as excess cost over fair value of acquired assets is now categorized as deferred outflows. The remaining difference is primarily due to a transformation of current assets (i.e., cash) into long-term capital assets (i.e., utility plants).

Deferred Outflows increased by \$78 million due to additional deferred losses on bond refunding for both the Pasco Utility Systems, in addition to the reclassification previously mentioned above.

Total liabilities decreased by \$27.6 million or 7.09%. This is due in large part to the transition of the Pasco Aqua Utility System to Pasco County. The reduction in liabilities to the remaining utility systems is from the normal progression of paying down debt as scheduled.

The increase in net position represents the degree to which revenues have exceeded expenses in the past year combined with the decrease in debt. The total change in net position of \$12.8 million includes the transition of the Pasco Aqua Utility System to Pasco County. During fiscal year 2020 the total net position improved for the remaining utility systems.

Net investment in capital assets (e.g., land, buildings, and equipment) presents net of any depreciation and the outstanding balances of any bond or other borrowings that are attributed to the acquisition, construction, or improvements of those assets. These assets are used to provide services to our customers, and consequently, these assets are not available for future spending (restricted). Net investment in capital assets ended the year with a balance of \$35.7 million which is a \$20.9 million improvement from the prior year balance of \$14.8 million. The balance increased because more capital assets were added than depreciation was expensed, and because more capital asset-related debt was paid off than was incurred.

Net Position Restricted for Capital Projects ended the year with a balance of \$11 million, which is a decrease of \$245,911. This is the balance in the Renewal and Replacement fund, the Water Capacity fund, the Wastewater Capacity fund, and other funds specifically restricted for capital projects which are net of related accounts payable. These funds are restricted by board resolutions and by bond covenants to be used only for the purchase or construction of capital assets to renew and expand the utilities' assets. Restricted for Capital Projects decreased for the remaining utility systems as more restricted funds were used for construction projects.

Net Position Restricted for Debt Service ended the year with a balance of \$14,897,457 which is a decrease of \$10,039,341 million as compared to the prior year. Restricted for Debt Service represents resources reserved for payment of the debt service (principal and interest) on external debt; consequently, these assets are not available for other uses.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

Restricted for Debt Service decreased this year due to bond refunding for the Pasco Utility System where debt service reserved funds were used to pay down the debt.

Net Position Unrestricted ended the year with a balance of \$67,547,602 which is an increase of \$2.1 million or 3.26% as compared to the prior year. Unrestricted funds may be budgeted for any future needs of the FGUA. The increase from FY 2019 to FY 2020 is primarily due to normal operations. Pasco benefited from lower debt service costs due to its bond refunding. The transition of Pasco Aqua to Pasco County did keep the increase in Net Position Unrestricted suppressed.

Condensed Statement of Net Position

	2020	2019
Current & Other Assets	\$ 124,549,968	\$ 216,774,360
Capital Assets	281,611,511	282,143,744
Total Assets	\$ 406,161,479	\$ 498,918,104

Unrestricted	67,547,602	65,415,936
Total Net Position	\$ 129,112,084	\$ 116,317,061

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

REVENUES AND EXPENSES

Operating revenues increased \$3.7 million. Operating expenses increased \$2.1 million. This increase is primarily due to the annual adjustments to the operating contracts.

For the fiscal year ending September 30, 2020, all FGUA utility systems' net positions increased except for the Pasco Aqua Utility System. The Pasco Aqua Utility System was transitioned to Pasco County on June 30, 2020.

The FGUA continues to maintain financially healthy systems. The unrestricted cash balance increased by 4.45% from \$65 million to \$67.9 million during fiscal year 2020, showing financially healthy utility systems with good liquidity.

Condensed Statement of Revenues, Expenses, and Changes in Net Position

	2020	2019
Operating revenues		
Water and wastewater revenues	\$ 82,306,151	\$ 79,668,592

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

SIGNIFICANT CAPITAL ASSET AND LONG-TERM DEBT ACTIVITY

The fiscal year ending September 30, 2020 represents the twenty-first full fiscal year of the FGUA's operations. The following are descriptions of significant capital asset and long-term activity.

CAPITAL ASSETS

During FY 2020, the FGUA's net capital assets decreased \$532,233 (-0.19%) due to the transition of Pasco Aqua to Pasco County (-\$6.1 million). The Lehigh utility had depreciation and impairments greater than capital asset additions during FY 2020. All remaining utilities had net increases totaling over \$9.4 million. Of the \$282 million balance of capital assets (net of depreciation), \$11.9 million represent costs incurred for capital projects that are under construction, but not yet completed as of September 30, 2020. Additional financial information on the FGUA's capital assets can be found in Note 6 of the Financial Section. Details on significant capital projects were described in the background information of each enterprise fund in the letter of transmittal in the introductory section.

DEBT ADMINISTRATION

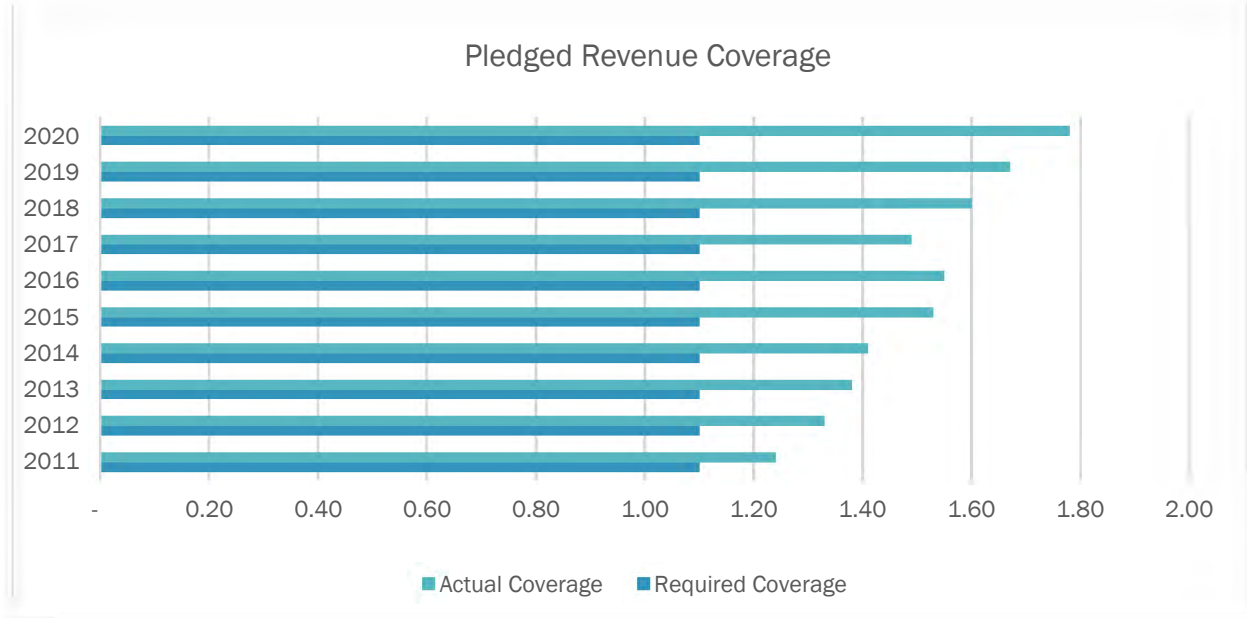

On September 30, 2020, the FGUA had outstanding debt in the amount of \$340 million in the form of revenue bonds including premiums and discounts, state revolving loans, seller financed notes, a capital lease, and a USDA loan. This is a decrease of \$26 million from the prior year's debt balance of \$366 million. The Pasco Aqua Utility System transition resulted in \$18 million of debt reduction. The Lake Aqua Utility System also added \$603,312 of debt in the form of a state revolving loan. MacDill also added \$525,825 in the form of additional Seller-Financed Notes. The bond refunding for the Pasco Utility System resulted in additional debt of \$5 million. Annual debt service payments accounted for a further \$14.4 million debt reduction.

The Consolidated, Lake Aqua, and Unified Aqua issuances have reserve accounts with a September 30, 2020 fair market value of \$4.4 million. The remaining outstanding debt issues are fully insured via municipal bond insurance policies issued by Ambac Assurance Corporation and Assured Guaranty.

The FGUA maintains a debt coverage ratio of 1.1 or better (net operating income to debt service) for each of its utilities. The following chart shows the actual coverage compared to the required coverage for the past ten years for debt secured by pledged water and wastewater revenues.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

The FGUA is prohibited by Chapter 163, Florida Statutes from imposing property taxes. In addition, it is further prohibited from issuance of general obligation debt. It is, however, authorized to impose special assessments upon property owners, whose property will benefit from water and wastewater system improvements.

Refer to Note 7 and the Statistical Section for more information on the FGUA's Long Term Debt and Coverage Ratios for each utility system.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

FINANCIAL RESULTS OF OPERATIONS BY SYSTEM

A core function of the FGUA is to use the collective power of local governments, performing as board members, to acquire, improve, operate, and maintain water and wastewater facilities. Local governments hold the option to acquire any FGUA utility system within its jurisdiction. This makes the FGUA a unique local government. The financial statements can fluctuate significantly as the FGUA acquires utility systems or transitions them over to the local government. There are also years that have small to moderate fluctuations when there are no acquisitions or transitions, and the financial activities are only reflective of traditional operational activities.

The major difference between FY 2020 and FY 2019 was the transition of the Pasco Aqua Utility System to Pasco County. Operating revenues and expenses also appear to have been impacted by the stay-at-home orders issued in response to the COVID-19 pandemic.

The impacts of acquisitions and transitions are reflected throughout this narrative as explanations for the large variances from the prior year. There appear to be large decreases in revenues and expenses due to the mid-year transition of the Pasco Aqua Utility System to Pasco County in Fiscal Year 2020. As a result, many of the explanations for the variances may seem redundant; however, each utility system of the FGUA operates independently. It is important, therefore, for the reader to understand that while the FGUA system, as a whole, may have been impacted by a transition activity in prior years; the explanations for the individual operations of the utility systems are more reflective of the traditional governmental utility operation.

OPERATING REVENUES

Operating revenues (excluding the Non-System Specific Fund) increased \$1.66 million or 2.0% from \$82.6 million in FY 2019 to \$84.2 million in FY 2020. This increase is primarily the result of annual rate adjustments combined with customer growth and usage.

- The Lehigh Acres Utility System realized a moderate increase in operating revenues of \$653,022 or 4.2% as compared to the prior year. This is primarily due to a small increase in customer growth and an increase in customer usage.
- The Pasco Utility System realized an increase in operating revenues of \$533,521 or 2.7% as compared to the prior year. This increase was primarily the result of customer growth and increased consumption.
- The Consolidated Utility System realized an increase in operating revenues of \$148,907 or 2.3% as compared to the prior year. This increase was primarily the result of a Consumer Price Index rate increase of 2.01% at the beginning of the year combined with an increase in customer usage.
- The Lindrick Utility System realized an increase in operating revenues of \$255,936 or 5.7% as compared to the prior year. This increase was primarily the result of a Consumer Price Index rate increase of 2.01% as the beginning of the year combined with an increase in customer usage and customer connections.
- The North Fort Myers Utility System realized an increase in operating revenues of \$284,256 or 2.3% as compared to the prior year. This is primarily due to a small increase in customer growth and an increase in customer usage.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

- The MacDill AFB Utility System operating revenues increased \$152,667 or 3.1%, as compared to the prior year. The increase is the result of the annual Consumer Price Index increase from the Federal Government.
- The Lake Aqua and Unified Aqua Utility Systems experienced a \$150,151 increase or 1.22% over FY 2019. This increase was primarily the result of a Consumer Price Index rate increase of 2.01% as the beginning of the year suppressed by a small number of permanent disconnections.
- The Dunnellon Utility System realized an increase in operating revenues of \$301,545 or 10.3% as compared to the prior year. This is primarily due to a small increase in customer growth and an increase in customer usage.
- The Pasco Aqua Utility System experienced a \$820,602 decrease or -22.7% over FY 2019. This is entirely due to the fact that the system was transitioned to Pasco County on June 30, 2020.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

OPERATING EXPENSES

Operating expenses (excluding the Non-System Specific Fund and depreciation and amortization) at first glance appear to be 0.4% higher than in FY 2019, increasing from \$42.4 million in FY 2019 to \$42.6 million in FY 2020. Once we remove the transfer of the Pasco Aqua Utility System, we find operating expenses increased approximately 1.5%.

- The Lehigh Utility System realized a decrease in operating expenses of \$6,676 or -0.1%.
- The Pasco Utility System realized an increase in operating expenses of \$344,154 or 3.3%. This is in line with expected annual operating expenditure increases.
- The Consolidated Utility System realized an increase in operating expenses of \$426,175 or 13.9%. This increase is primarily due to increased bulk wastewater billings (\$286,630), the remainder of the increase is in line with expected annual operating expenditure increases.
- The Lindrick Utility System realized a decrease in operating expenses of \$88,230 or -3.4%. This is primarily related to lower purchased water expenses.
- The North Fort Myers Utility System realized a decrease in operating expenses of \$113,812 or -2.0%. This is related to changes in the new operating contracts.
- The MacDill AFB Utility System realized an increase in operating expenses of \$81,596 or 3.1%. This is in line with expected annual operating expenditure increases.
- The Lake Aqua and Unified Aqua Utility Systems operating expenses were \$23,166 lower (-0.33%) in FY 2020.
- The Pasco Aqua Utility System realized a decrease in operating expenses of \$441,545 or -25.3%. This is entirely due to the transition to Pasco County on June 30, 2020.
- The Dunnellon Utility System realized an increase in operating expenses of \$84,311 or 5.0%. This is in line with expected annual operating expenditure increases.

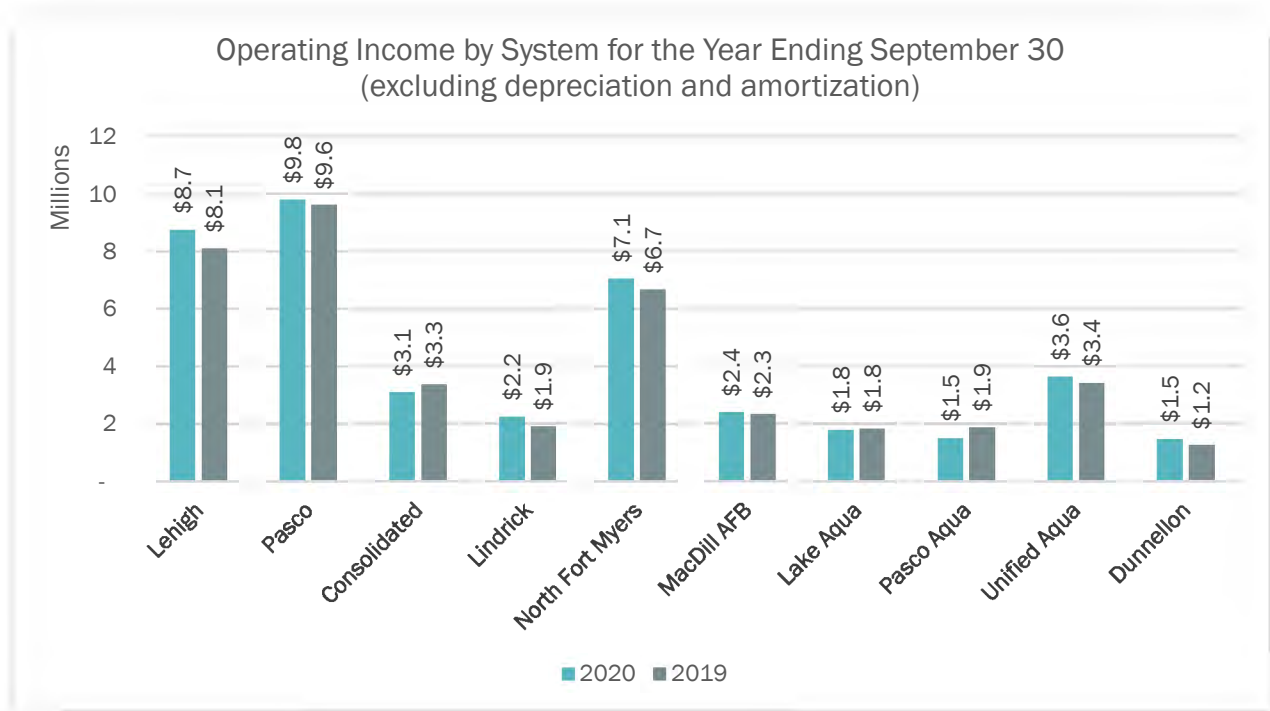

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

NET OPERATING INCOME

Operating income is the net of operating revenue against operating expenses. Details of the changes in operating revenues and expenses are described in the previous pages for each of the utility systems. Below is a chart showing the net result.

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

FACTORS EXPECTED TO HAVE AN ECONOMIC IMPACT ON FUTURE OPERATIONS

The primary factors that have an economic impact on the FGUA's future operations include: additions and deletions of utility systems, restructuring acquisition debt, development and customer growth within system territories, and rate changes. Severe weather also tends to have a significant impact on operating expenses but cannot be predicted.

■ ADDITIONS AND DELETIONS OF UTILITY SYSTEMS

In December 2019, Pasco County approved taking ownership of the Lindrick Utility System (FY 2021 or FY 2022).

■ DEBT

Advance refunding of acquisition debt between 2010 to 2018 will result in significant decreases in debt service for many of the FGUA systems in the future. In October 2019 the Pasco Utility System's Series 2010 bonds were advanced refunded and an additional \$5 million in debt was incurred resulting in debt service savings of \$894,000 per year. These debt service savings will be realized in future years.

■ RATE CHANGES

The Consolidated Utility System added a rate for reclaimed water service on 12/01/2018 in preparation for when reclaimed water service became available. This resulted in a significant decrease in potable water revenues as customers change from regular treated water to using reclaimed water on separate irrigation meters. The reclaimed water is supplied by Pasco County Utilities through a bulk reclaimed water agreement.

■ DEVELOPMENT

Developers have resumed building resulting in increased demand of connections in FY 2019 and FY 2020.

The Lehigh Utility System has the greatest number of undeveloped parcels within its service territory as compared to the other FGUA service territories. Many of the Lehigh Acres parcels are scattered throughout the territory as opposed to being in consolidated lots owned by developers. The Lehigh Acres Utility System collected \$1 million in Impact fees during FY 2020 for an approximate 360 equivalent residential connections (ERCs).

In the Pasco Utility System, the FGUA has committed to capacity for the Mitchell 54 development. This development project will result in over 600 new residential units as well as multiple commercial developments, which should equate to approximately 3% more connections between FY 2019 and FY 2021. In FY 2020 the Pasco Utility System collected \$767,716 in impact fees for an approximate 590 equivalent residential connections (ERCs).

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

CUSTOMERS

The number of customer connections decreased overall during FY 2020 by 5,139 because of the transition of the Pasco Aqua Utility System. There was positive utility growth for the majority of the other systems during FY 2020. The Lehigh Acres Utility System experienced the greatest year over year customer growth with a net addition of 511 active connections. We predict the rate of future growth will continue to be relatively flat for most of the utility systems. Management monitors growth closely as it has an impact on the infrastructure needs of the utility systems and requires prudent long-term capital planning. The FGUA will continue to meet system demands by managing the capital improvement projects in accordance with the FGUA capital improvement plan that is adopted each September with the FGUA operating budget. (Details on customer growth for the past ten years can be found in the Statistical Section).

The following chart depicts the change in water and wastewater billed customers over the last two years. All the FGUA systems charge base fees if there is a connection that must be maintained, whether occupied or vacant.

System	Water Customers				Wastewater Customers			
	6/30/2020	6/30/2019	Growth	Percent Growth	6/30/2020	6/30/2019	Growth	Percent Growth
Lehigh Acres	13,505	13,208	297	2.25%	11,179	10,965	214	1.95%

Note:

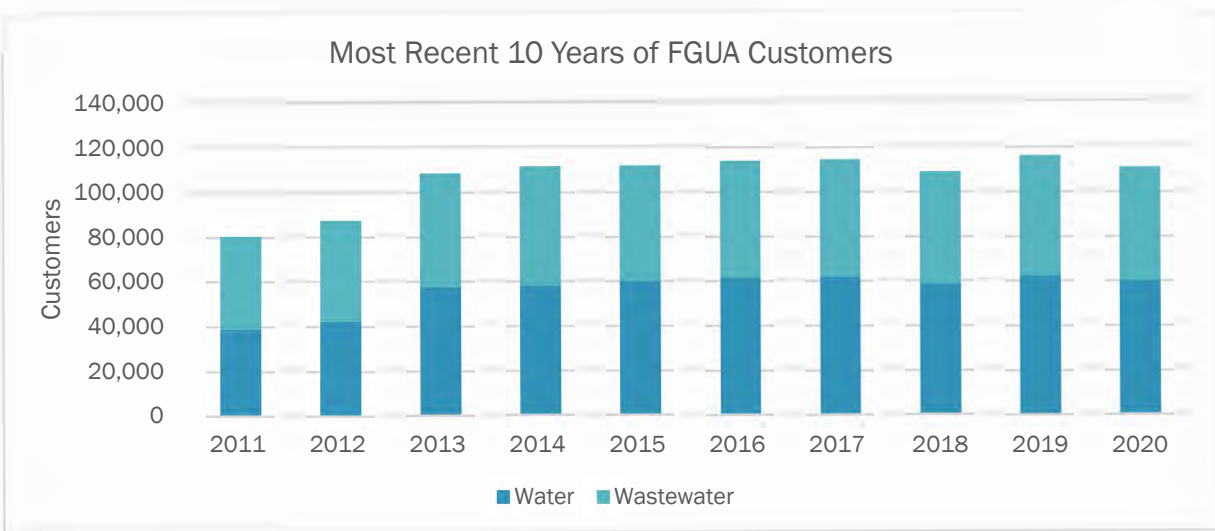

Reflects active customers on June 30

FINANCIAL

Florida Governmental Utility Authority Management's Discussion and Analysis (continued)

The following chart shows the change in the number of customers over the past ten years. While the individual utilities have traditionally experienced relatively flat growth in the customer base, acquisitions of new systems and transitioning of existing systems may be reflected in the changes shown below. In 2010, the FGUA acquired the Consolidated, Lindrick, and North Fort Myers utility systems. In 2012, the FGUA acquired the Mad Hatter/Paradise Lakes utility systems. In 2013, the FGUA acquired the Lake Aqua, Pasco Aqua, and Unified Aqua utility systems. The FGUA transferred the Golden Gate Utility System to Collier County in 2018. The FGUA acquired the Dunnellon Utility System in 2018. The FGUA transferred the Pasco Aqua Utility System to Pasco County in 2020. The number of utility systems and the size of the customer base of each system for a given year affect the upward and downward changes over this ten-year period.

Refer to the Statistical Section for additional information.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Florida Governmental Utility Authority's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the FGUA Office of the Chief Financial Officer, 280 Wekiva Springs Road, Suite 2070, Longwood, FL 32779.

Florida Governmental Utility Authority
Notes to Financial Statements
September 30, 2020

(1) **Summary of Significant Accounting Policies:**

(a) **Reporting entity**—The Florida Governmental Utility Authority (the “Authority”) was formed as a legal entity and public body pursuant to Chapters 125, 166 and 163, Florida Statutes and an Interlocal Agreement dated February 1, 1999, (the "Interlocal Agreement") initially by and between Brevard County, Lee County, Polk County, and Sarasota County (the "Authority Members"), each a local government located in the State of Florida. The Interlocal Agreement was amended and restated on December 1, 2000, by and between Citrus County, Nassau County, Polk County, and Sarasota County. Sarasota County was a member of the Interlocal Agreement, but withdrew effective August 29, 2002, after assuming ownership of the Authority's assets and liabilities related to the Sarasota Utility System. On January 16, 2003, Osceola County was accepted as a member. Osceola County has since terminated its membership and the Poinciana Utility System assets and liabilities were transferred to the Tohopekaliga Water Authority on April 30, 2007. The Citrus Utility System was transitioned to Citrus County on February 15, 2007. On October 15, 2005, Lee County rejoined the Authority subsequent to the purchase of the Lehigh Acres System. The Town of Dundee joined as a member on June 12, 2007, and subsequently withdrew on January 21, 2010. Hendry County joined as a member on February 21, 2008. Pasco County joined as a member on February 27, 2008. DeSoto County joined as a member on January 13, 2009, and terminated its membership on November 12, 2015. The purpose of the Authority is to enable the Authority Members to make the most efficient use of their common power to acquire, own, improve, operate, and maintain water and wastewater facilities. It is not expected that the Authority will have any employees. All services will be provided on a contractual basis.

Based on the criteria in Governmental Accounting Standards Board (GASB) Codification, the Authority has determined that there are no other units that meet the criteria for inclusion in the Authority's financial statements.

(b) **Measurement focus, basis of accounting, and financial statement presentation**—The accounting systems of the Authority are organized on the basis of funds, each of which is considered an accounting entity having a self-balancing set of accounts for recording its assets, deferred outflows, liabilities, deferred inflows, net position, revenues, and expenses. Since the Authority is a special purpose government involved solely in the provision of water and wastewater services to its customers on a fee basis, all funds are accounted for in Proprietary Funds. The Authority utilizes the accrual basis of accounting in accordance with the GASB Codification.

The focus of proprietary fund measurement is the determination of net income, financial position, and cash flows. The proprietary funds are used to account for operations: (a) that are financed and operated in a manner similar to private business enterprises - where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenue earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes. The Authority operates ten utility systems (Lehigh Acres, Pasco, Consolidated, Lindrick, North Fort Myers, MacDill AFB, Lake Aqua, Pasco Aqua, Unified Aqua, and Dunnellon) in ten separate funds. The Authority has one non-system specific fund that handles the administration of the interlocal agreements. All funds are considered major funds.

FINANCIAL

Notes to Financial Statements
September 30, 2020

(1) **Summary of Significant Accounting Policies:** (Continued)

(c) **Cash and cash equivalents**—Cash and cash equivalents consists of cash on hand and on deposit in banks and money market accounts. Investments with a maturity of three months or less when purchased are considered to be cash equivalents.

(d) **Investments**—Investments are carried at fair value.

(e) **Accounts receivable**—The Authority's accounts receivable consists of amounts due from consumers. The Utility Systems perform credit evaluations on their consumers and generally require collateral deposits from them.

(f) **Restricted assets and reserves**—Certain assets are required to be segregated from other assets due to various bond indenture agreements. These assets are legally restricted for specific purposes such as debt service, construction, and renewals and replacements. The remaining excess of restricted assets over liabilities is reflected as restricted net position.

(g) **Property and plant**—Property and plant are recorded at cost less accumulated depreciation, except contributed assets which are recorded at acquisition value on the date of contribution. Expenditures of \$5,000 or more are capitalized. Depreciation, on a straight-line basis, is charged over estimated useful lives ranging from 5 to 35 years.

(h) **Intangibles**—The excess cost over fair value of acquired assets is being amortized, on a straight-line basis, over the approximate life of the related assets purchased, ranging from 20 to 30 years. The right-of-use capacity agreement for the Lindrick Utility System has an indefinite life.

(i) **Bond discounts and premiums**—Bond discounts and premiums are deferred and amortized over the term of the bonds using the effective interest method.

(j) **Revenue recognition**—Operating revenue consists primarily of charges for services, which are billed to customers for water, wastewater, and reclaimed water service. Billings are included in revenue as meters are read on a cycle basis throughout each month. Unbilled revenues are accrued based on estimated consumption of the most recent billing. For the MacDill AFB system, all water and wastewater revenues are earned based on the terms set forth in a formal agreement between the Authority and the Federal government.

(k) **Net position flow assumption**—Sometimes the Authority will fund outlays for a particular purpose from both restricted and unrestricted resources. In order to determine amounts reported as restricted and unrestricted net position, it is the Authority's policy to consider restricted net position to have been used before unrestricted net position is applied.

(l) **Operating and nonoperating revenues and expenses**—Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with principal ongoing operations. The Authority's principal operating revenues are charges for water and sewer services. Operating expenses include the costs to maintain and repair the water and sewer treatment plants, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

FINANCIAL

Florida Governmental Utility Authority
Notes to Financial Statements
September 30, 2020

(1) **Summary of Significant Accounting Policies:** (Continued)

(m) **Capital grants, contributions, and impact fees**—Impact fees are imposed by the Utility Systems to acquire, construct, equip, or expand the capacity of the water and/or wastewater facilities in order to serve new users of the facilities and new development within the service area of the Utility Systems. Impact fees revenue is recognized when the related connection services are performed. Capital contributions represent contributions of certain water distribution and wastewater collection systems. Such contributions are recognized as revenue in the period they are received. The recoverable portion of system purchase price is earned in the MacDill AFB System based on the terms set forth in the agreement with the Federal government. Capital grants represent funding from state and Federal agencies to support capital asset construction.

(n) **Deferred outflows/inflows of resources**—In addition to assets, the statement of financial position will, if required, report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. It consists of the deferred loss on refunding and the excess of cost over fair value of acquired assets, net of related amortization. A deferred loss on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. The excess of cost over fair value of acquired assets is the difference between the consideration given when a new utility system is acquired and the fair value of the net position acquired. This amount is deferred and amortized over 30 years.

In addition to liabilities, the statement of financial position will, if required, report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Authority has no items that qualify for reporting in this category.

(o) **Use of estimates**—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

(p) **Risk management**—The Authority participates in various insurance programs for property and casualty losses. Coverage includes property, general liability, and public officials insurance. Environmental impairment insurance for potential spills is maintained with a third-party insurance carrier. Settled claims have not exceeded insurance coverage during the last three fiscal years.

(2) **Purchase and Transition of Utility Systems:**

In recent years, the Authority has periodically engaged in acquiring new utility systems, most recently acquiring the Dunnellon system in fiscal year 2019. No such acquisitions or transitions occurred during the year ended September 30, 2020. Subsequent to year end, the Authority acquired the Flagler County Utility System on December 10, 2020, as further described in Note (9).

FINANCIAL

Florida Governmental Utility Authority
Notes to Financial Statements
September 30, 2020

(3) **Sale of Utility Systems:**

Aqua Pasco utility system—Effective June 30, 2020, Pasco County Water-Sewer District, a component unit of Pasco County, Florida, acquired all assets and assumed all operating liabilities of the Pasco Aqua Utility System at net book value. This transaction resulted in a loss of approximately \$3,253,480, equal to the net position of the Pasco Aqua Utility System at the sale date.

(4) **Deposits and Investments:**

(a) **Deposits**—At September 30, 2020, the Authority held cash on deposit with various financial institutions. In addition to insurance provided by the Federal Depository Insurance Corporation, deposits are held in banking institutions approved by the State Treasurer of the State of Florida to hold public funds. Under Florida Statutes Chapter 280, Florida Security for Public Deposits Act, the State Treasurer requires all Florida qualified public depositories to deposit with the Treasurer or another banking institution eligible collateral. In the event of failure of a qualified public depository, the remaining public depositories would be responsible for covering any resulting losses. The Authority's deposits at year end are considered insured for custodial credit risk purposes.

(b) **Investments**—The Authority measures and records its investments using fair value measurement guidelines established by GASB Codification. These guidelines recognize a three-tiered fair value hierarchy, as follows:

Level 1: Assets or liabilities for which the identical item is traded on an active exchange, such as publicly-traded instruments or futures contracts.

Level 2: Assets and liabilities valued based on observable market data for similar instruments. Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable for assets and liabilities, either directly or indirectly.

Level 3: Assets or liabilities for which significant valuation assumptions are not readily observable in the market and instruments, which are valued based on the best available data. Fair value is estimated using unobservable inputs that are significant to the fair value of the assets or liabilities. Level 3 assets may include instruments for which the determination of fair value requires significant management judgment or estimation.

At September 30, 2020, the Authority held no additional investments after the Level 2 Municipal bonds held matured July 15, 2019. The monies from the bond were deposited into cash accounts.

(c) **Custodial credit risk**—For an investment, custodial credit is the risk that, in the event of the failure of the counterparty, the Authority will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. In order to manage the custodial credit risk, the Authority's investment policy specifies certain requirements to pre-qualify financial institutions and brokers/dealers and an annual review of the institutions used.

FINANCIAL

Florida Governmental Utility Authority
Notes to Financial Statements
September 30, 2020

(4) **Deposits and Investments:** (Continued)

(d) **Credit risk**—Credit risk is the risk that an issuer or other counter party to an investment will not fulfill its obligations. The Authority does have a formal investment policy that limits its investments to high quality investments to control credit risk, which requires diversification of investments, limited investments in securities with higher credit risks, investing in securities with varying maturities, and continuously investing a portion of the portfolio in readily available funds such as local government investment pools or money market funds. In addition, certificates of deposit and other evidences of deposit at qualified depositories, bankers' acceptances, and commercial paper, rated in the highest tier (e.g., A-1, P-1, F-1 or D-1 or higher) by a nationally recognized rating agency. The money market mutual funds do not have credit quality ratings.

(e) **Interest rate risk**—Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The Authority has a formal investment policy that, except for special situations, limits investment maturities to instruments maturing within three years from purchase as a means of managing exposure to fair value losses arising from increasing interest rates. At September 30, 2020, the Authority had no investments subject to interest rate risk.

(5) **Accounts Receivable:**

Receivables at September 30, 2020, consist of the following:

	Non-System Specific	Lehigh Utility System	Pasco Utility System	Consolidated Utility System

(7) Bonds and Notes Payable: (Continued)

For the above debt instruments secured by pledged water and wastewater revenues, amounts pledged consist of the respective system's operating revenues for the course of the long-term debt payments. The debt instruments were issued to purchase the utility systems and to fund various capital improvements. The amounts and terms of the commitments are clearly stated in the detailed descriptions above for each debt instrument.

Below is a table comparing the current year's pledged revenue (including revenue from the sale of water and wastewater, meter tapping, service charges, miscellaneous operating revenue, and any amounts contributed from capitalized interest and rate stabilization accounts) to the current year's principal and interest (net of Build America Bond subsidies received) required debt service. Further details may be found in the Pledged Revenue Coverage tables in the Statistical Section.

September 30	Water, Wastewater and Other Revenue	Debt Service	
		Principal	Interest

The Lehigh 2010 Bond series were in-substance defeased on September 7, 2017. The escrow account to legally defease these bonds was funded by issuing the 2017 series of bonds and using unrestricted cash accumulated in the Lehigh Acres enterprise fund. The escrow account consists of multiple U.S. treasury notes timed to mature in step with interest and principal payments with the final maturity on 9/30/2021. The balance of outstanding in-substance defeased debt as of September 30, 2020, is \$12,535,000. This amount will be available to be redeemed early on October 1, 2021.

The Pasco 2010B Bond series were in-substance defeased on October 3, 2019. The escrow account to legally defease these bonds was funded by issuing the 2019 series of bonds. The escrow account consists of multiple U.S. treasury notes timed to mature in step with interest and principal payments with the final maturity on 10/1/2040. The balance of outstanding in-substance defeased debt as of September 30, 2020, is \$12,535,000. This amount will be available to be redeemed early on October 1, 2020.

(8) **Commitments and Contingencies:**

(a) **U.S. Water/Wade Trim, LLC**—Contracted to perform water treatment, water distribution, wastewater treatment, wastewater disposal and control, and other related services for all utility systems of the Authority. With the exception of Lehigh Acres, which had a contract effective date of October 1, 2011, the contract terms started on the effective date of the acquisitions of each system, and expire on varying dates from September 30, 2019, to September 30, 2020. With the exception of MacDill AFB, new contracts were entered into effective October 1 or November 1, 2019, and expire on September 30, 2024.

U.S. Water receives an annual fixed fee for services provided to the systems of \$24,420,228, paid in monthly installments. Fees in future years are adjusted as defined in the Operations and Billing Contract. The Operations and Billing Contract also provides for additional payments to U.S. Water for renewals and replacements and for capital improvements. Such additional payments are to be at U.S. Water's cost plus a specified profit percentage. Total amounts paid to U.S. Water for the year ended September 30, 2020 for all services were \$42,716,599. At September 30, 2020, amounts payable to U.S. Water totaled \$5,707,225.

FINANCIAL

Florida Governmental Utility Authority
Notes to Financial Statements
September 30, 2020

(8) **Commitments and Contingencies:** (Continued)

(b) **Government Services Group, Inc.**—In order to execute the powers of the Authority pursuant to the Interlocal Agreement and the responsibilities of the Authority, the Authority retained Government Services Group, Inc. (GSG), a private contractor, for the overall management of the Authority. The Management Services Agreement between the Authority and GSG defines the general functions GSG will carry out and expires September 30, 2025. The Authority has the option to extend the term of the Management Services Agreement. GSG receives an annual base fixed fee for general administrative services provided to the Authority of \$3,939,828, as well as an annual based fixed fee for capital improvement program administrative fees of \$1,400,730. Additional payments are made for other services approved by the Authority's Board of Directors. Total amounts paid to GSG for the year ended September 30, 2020, were \$7,019,630. At September 30, 2020, amounts payable to GSG totaled \$352,232.

(c) **North Fort Myers System contingent payments**—As part of the purchase agreement for the North Fort Myers System, the Authority agreed to pay the seller 50% of impact fees collected for a period of 20 years from the closing date in June 2010 or until \$25 million has been paid to the seller, whichever occurs first. In accordance with this agreement, \$1,417,351 has been incurred through September 30, 2020. Of this amount, \$379,280 was incurred during the year ended September 30, 2020. As of September 30, 2020, there was \$127,910 payable. The Authority also entered into a settlement with a developer of a specific subdivision whereby the developer is entitled to \$635 per lot (less a 2.0% handling fee) when impact fees are paid. As of September 30, 2020, the total amount incurred under this agreement is \$221,844. No amounts were incurred during the year ended September 30, 2020.

(d) **Contracts**—Commitments on outstanding contracts for improvements and maintenance of the Utility Systems totaled \$15,975,546 at September 30, 2020.

(e) **Other pending litigation**—The Utility Systems are contingently liable with respect to regulatory inquiries and other claims incidental to the ordinary course of its operations. In the opinion of management, based on the advice of legal counsel, the ultimate disposition of these regulatory inquiries and claims will not have a material adverse effect on the financial position or results of operations of the Utility Systems.

(f) **Grant compliance**—The Authority participates in various federal and state grant programs, the principal of which is subject to program compliance audits pursuant to the Single Audit Act, as amended. Accordingly, the Authority's compliance with applicable grant requirements will be established at a future date. The amount of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although the Authority anticipates such amounts, if any, will be immaterial.

FINANCIAL

Florida Governmental Utility Authority
Notes to Financial Statements
September 30, 2020

(9) **Subsequent Events:**

On December 19, 2019, the Authority's Board of Directors authorized the acquisition of certain water and wastewater assets owned by Flagler County, Florida. The Board also authorized a Purchase and Sales Agreement for an amount not to exceed \$16,428,024. The purchase price of the utility system includes amounts to cover the cost to retire Flagler County's outstanding utility-related debt, which was estimated to be \$16,365,356. The Authority obtained the necessary financing through the issuance of the Flagler Utility System Revenue Note, Series 2019, and funding from USDA and the Florida Department of Environmental Protection SRF loans. The acquisition was closed on December 10, 2020. The acquired system will be placed into a separate enterprise fund, Flagler Utility System, for financial reporting purposes.

(10) **Risks and Uncertainties – COVID-19:**

During the year ended September 30, 2020, local, U.S., and world governments have encouraged self-isolation to curtail the spread of the global pandemic, coronavirus disease (COVID-19), by mandating temporary work stoppage in many sectors and imposing limitations on travel and size and duration of group meetings. Most industries are experiencing disruption to business operations and the impact of reduced consumer spending.

There is unprecedented uncertainty surrounding the duration of the pandemic, its potential economic ramifications, and any government actions to mitigate them. Accordingly, while management cannot quantify the financial and other impact to the Authority as of September 30, 2020, management believes that a material impact on the entity's net position and results of future operations is reasonably possible.

2020	295,608,535	31,106,119	393,030	327,107,684	na	2,950

Reconciliation to Note 7:

2020 Debt from Note 7

Secured by pledged water and wastewater revenues:	Exclude	Total Primary Government
Bonds (1)	295,608,535	295,608,535
Seller-Financed Notes (2)	4,000,000	4,000,000
State Revolving Loans (2)	2,610,873	2,610,873
USDA Loans	12,602,546	12,602,546
Secured by other (county bonds, assets, etc)	Exclude	Total Primary Government
Capital Leases	393,030	393,030
MacDill AFB Seller-Financed Note (2)	(12,413,583)	-
Notes Payable (SunTrust) (2)	11,892,700	11,892,700
	339,521,267	(12,413,583)
		327,107,684

Notes: (1) Net of Premiums and Discounts

(2) Other Debt includes State Revolving Loan Fund (SRF) debt, the SunTrust Energy Project debt, and Seller-Financed Notes. The MacDill AFB Seller-Financed note is excluded because it is fully-subsidized, the note is not secured by revenues, and because the AFB is considered one customer, which would skew the "per utility customer" ratio. See Note 7 for MacDill debt balance.

+ Wastewater treatment provided by Hillsborough County, Florida

++Wastewater treatment provided by City of New Port Richey (0.700 MGD)

+++Wastewater treatment provided by Pasco county, Florida

(1) The Aloha Gardens and Seven Springs service areas are combined for Financial reporting purposes and called the Pasco Utility Systems.

(2) The Consolidated System is comprised of thirteen small service areas.

(3) Flows reported for Lake Fairways only.

(4) The North Fort Myers wastewater treatment is comprised of 2 treatment plants.

(5) Flows reported for Linda Lakes WWTP only.

(6) Partial Year Average Daily Flow for FY 18 (Oct 17 - Jan 18)

**INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL
REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT
OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH
GOVERNMENT AUDITING STANDARDS**

To the Board of Directors,
Florida Governmental Utility Authority:

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in the *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the business-type activities and each major fund of Florida Governmental Utility Authority (the Authority) as of and for the year ended September 30, 2020, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements, and have issued our report thereon dated March 12, 2021.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Authority's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the Authority's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

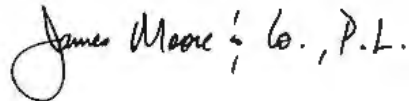

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Authority's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

OTHER

Florida Governmental Utility Authority
Notes to Schedule of Expenditures of
State Financial Assistance
For the Year Ended September 30, 2020

(1) **Basis of Presentation:**

The accompanying schedule of expenditures of state financial assistance (the Schedule) includes the state financial assistance activity of Florida Governmental Utility Authority (the Authority), under programs of the state government for the year ended September 30, 2020. The information in this Schedule is presented in accordance with the requirements of Section 215.97, Florida Statutes. Because the Schedule presents only a selected portion of the operations of the Authority, it is not intended to and does not present the financial position, changes in net assets, or cash flows of the Authority.

(2) **Summary of Significant Accounting Policies:**

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following, as applicable, the cost principles contained in Section 215, Florida Statutes wherein certain types of expenditures are not allowable or are limited as to reimbursement.

Pass-through entity identifying numbers are presented where available.

No amounts were passed through to subrecipients during the year ended September 30, 2020.

(3) **De Minimis Indirect Cost Rate Election:**

The Authority does not elect to use the 10% de minimis indirect cost rate as covered in §200.414, *Indirect (F&A) Costs*, of the Uniform Guidance.

(4) **Loans Outstanding:**

The Authority had the following loan balances outstanding at September 30, 2020:

<u>Program Title</u>	<u>CSFA Number</u>	<u>Expenditures Incurred During the Year Ended 9/30/2020</u>	<u>Outstanding Loan Amount</u>
Florida Department of Environmental Protection: Wastewater Treatment Facility Construction	37.077	\$ 603,312	\$ 603,312

There are no continuing compliance requirements associated with the above noted loans.

Financial Statements:

Type of audit report issued on the financial statements: Unmodified

Internal control over financial reporting:

Material weakness(es) identified? yes no

Significant deficiency(ies) identified? yes none reported

Noncompliance material to financial statements noted? yes no

State Projects:

Internal control over major State projects:

Material weakness(es) identified? yes no

Significant deficiency(ies) identified? yes none reported

Type of auditor's report issued on compliance for major State projects: Unmodified

Any audit findings disclosed that are required to be reported in accordance with Chapter 10.557, Rules of the Auditor General? yes none reported

Dollar threshold used to distinguish between type A and type B programs: \$444,052

Identification of major State projects:

CSFA Number	Program Name
37.052	Florida Springs Grant Program

- II. **Financial Statement Findings:** None.
- III. **State Financial Assistance Projects Findings and Questioned Costs:** None.
- IV. **Summary Schedule of Prior Audit Findings:** Not applicable as no prior year findings have been reported.
- V. **Corrective Action Plan:** Not applicable as no current year findings have been reported.
- VI. **Management Letter:** No management letter pursuant to Sections 215.97(9)(f) and 215.97(10)(d), Florida Statutes is required since there are no items related to state financial assistance required to be reported in the management letter, not already reported in this schedule.

**INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH
MAJOR STATE PROJECT AND REPORT ON INTERNAL CONTROL
OVER COMPLIANCE REQUIRED BY CHAPTER 10.650, RULES OF THE
AUDITOR GENERAL**

To the Board of Directors,
Florida Governmental Utility Authority:

Report on Compliance for Each Major State Project

We have audited the Florida Governmental Utility Authority's (the Authority) compliance with the types of compliance requirements described in the Department of Financial Services' *State Projects Compliance Supplement*, that could have a direct and material effect on each of the Authority's major state projects for the year ended September 30, 2020. The Authority's major state projects are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the State statutes, regulations, and the terms and conditions of its state projects applicable to its state projects.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of the Authority's major state projects based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Chapter 10.650, Rules of the Florida Auditor General. Those standards and Chapter 10.650, Rules of the Auditor General, require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major state project occurred. An audit includes examining, on a test basis, evidence about the Authority's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major state project. However, our audit does not provide a legal determination of the Authority's compliance.

Opinion on Each Major State Project

In our opinion, the Authority complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major state projects for the year ended September 30, 2020.

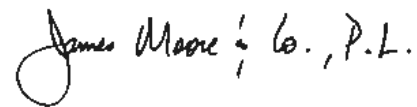

Report on Internal Control over Compliance

Management of the Authority is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Authority's internal control over compliance with the types of requirements that could have a direct and material effect on each major state project to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion for each major state project and to test and report on internal control over compliance in accordance with Chapter 10.650, Rules of the Auditor General, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a state project on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a state project will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or as combination of deficiencies, in internal control over compliance with the type of compliance requirement of a state project that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses, or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and results of that testing based on the requirements of Chapter 10.650, Rules of the Auditor General. Accordingly, this report is not suitable for any other purpose.
